Design/Architecture

The design of our project is chosen so that when the buyer for the first time came into our site it was more comfortable in his soul and he could feel all the comfort that can give you our product. Green color gives some comfort and makes our site more unique, attracting its richness and beauty, and about the white color that harmonizes so beautifully with the green we can say that it helps to cheer up a person and to forget all the problems while visiting our site.

About architecture, the first time a customer enters our site he can look at all the furniture that we have, but will not have access to order. To do this, he must first register, and if he is not with us for the first time he must log in to the account he already has.

For easy browsing and use of our store, we have added pagination and search page

History

After creating our group, we first discussed the design of our project and approximately how many pages we would add so that the client could use our site comfortably. After that, each member of the group took responsibility for adding different functions such as customer authorization, product selection and redemption, more pages like profile and search, as well as different small things for user-friendly use.

In the future we want to add additional features like filtering and also so that the buyer can know a more detailed description of our furniture for each product we will add the types of colors we have, production or where and who made it, size and so on. In addition, we plan to add information about discounts or new products for even more convenient use, as well as a way where the user can book our product for a month in advance or buy on installments.
